- 10) **2017-present:** Founded Cell Therapy International (CTI), aiming at real cure for neurological diseases.

Education and Diplomas:

- 1) **General Science Diploma:** Mention “*outstanding excellence*”, qualified for the med-school accelerated 6 years program.
- 2) **MD Diploma:** With honors and awards, the Dean’s list.
- 3) **ECFMG Certificate.**
- 4) **Federation Licensing Certificate.**
- 5) **Neurosurgery Training Certificate:** From the “*Universite’ Du Dijon*” Department of neurosurgery , with subspecialty in spinal interventions.
- 6) **American Board of Neurology & Psychiatry Diploma.**
- 7) **Certificates of successfully completion of ATLS, ACLS, BLS, BOTOX advanced interventions, Neuroimaging, EMG/NCS, Transcranial Doppler/Ultrasound and Spinal Stimulator Implant.**

Languages:

English, Judeo-Arabic, French and Spanish.

Honors and Awards:

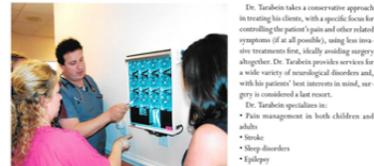

- 1) Top Doctor in America award; 5 years in a row (2012-2017).
- 2) World Leading Physician award.
- 3) National Leadership Award issued by the United States Congress.
- 4) AMA Physician Recognition Award.
- 5) Featured on MD News national magazine. With 8 pages detailing his success story in healthcare and neurosciences

Patient undergoing nerve testing
Dr. Tarabein uses several tests to properly diagnose his patients. Many of these tests can be performed in his office. These tests include: EMG/NCV, Doppler ultrasound and neurovascular studies, carotid Doppler/ultrasound, EEG, and EMG needle guided injections.
Proper testing is essential for correct diagnosis since MRI technology, although effective, provides a limited view. Additionally, other tests may be necessary to better pinpoint the cause of the pain, discomfort or other undetected symptoms.
Understanding that the patient's knowledge of their body is important, Dr. Tarabein is a spontaneous listener and is more

Patient undergoing CEE testing

Discussing a patient MRI result
Dr. Tarabein combines the two approaches so patients can be diagnosed and treated in the same location, which also facilitates better communication between Dr. Tarabein and his team.

Patient after minor surgical procedure for back pain

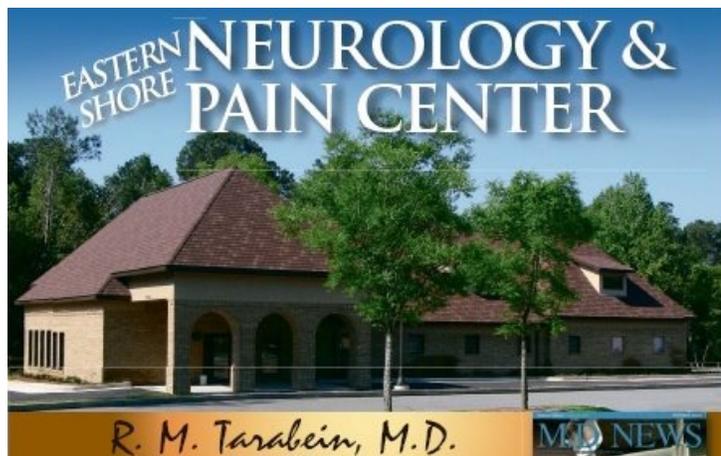

Dr. Tarabein takes a conservative approach in treating his clients, with a specific focus for controlling the patient's pain and other related symptoms (if at all possible), using less invasive treatments first, ideally avoiding surgery altogether. Dr. Tarabein provides services for a wide variety of neurological disorders and, with his patients' best interests in mind, surgery is considered a last resort.
Dr. Tarabein specializes in:

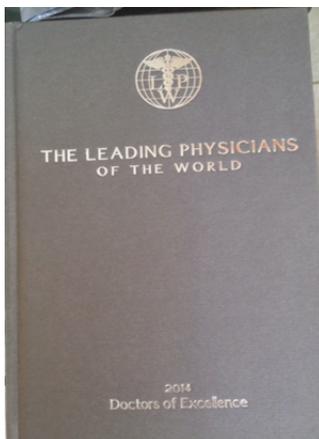

- Pain management in both children and adults
- Stroke
- Sleep disorders
- Epilepsy
- Auto-immune injuries and workers' compensation
- Migraines
- Fibromyalgia and chronic fatigue syndrome
- Movement disorders
- Failed back and neck surgeries
- Child neurological disorders
